

bioMérieux – Increased outlook for full-year 2020

Marcy l'Étoile, December 14, 2020 – bioMérieux, a world leader in the field of *in vitro* diagnostics, today released its adjusted outlook for full-year 2020.

- **Full-year 2020 net sales are now expected to be around 18% at constant exchange rates and scope of consolidation and contributive operating income before non-recurring items about €600 million.**
- **As a reminder, this 2020 exceptional performance is not projectable beyond 2020**

Fourth-quarter 2020 sales and 2020 financial results

February 24, 2021

Notes and definitions

The above forward-looking statements are based, entirely or partially, on assessments or judgments that may change or be modified, due to uncertainties and risks related to the Company's economic, financial, regulatory and competitive environment, notably those described in the 2019 Universal Registration Document. Accordingly, the Company cannot give any assurance nor make any representation as to whether the objectives will be met. The Company does not undertake to update or otherwise revise any forecasts or objectives presented herein, except in compliance with the disclosure obligations applicable to companies whose shares are listed on a stock exchange.

Currency effect: this is established by converting actual numbers at the average rates of year y-1. In practice, those rates are either average rates communicated by the ECB, or hedged rates if hedging instruments have been set up.

Changes in scope of consolidation: these are determined:

- for acquisitions in the period, by deducting from sales for the period the amount of sales generated during the period by acquired entities as from the date they entered the consolidated reporting scope;
- for acquisitions in the previous period, by deducting from sales for the period the amount of sales generated in the months in the previous period during which the acquired entities were not consolidated;
- for disposals in the period, by adding to sales for the period the amount of sales generated by entities sold during the previous period in the months of the current period during which these entities were no longer consolidated;
- for disposals in the previous period, by adding to sales for the period the amount of sales generated during the previous period by the entities sold.

Note: Unless otherwise stated, growth is expressed year-on-year at constant exchange rates and scope of consolidation (like-for-like).

ABOUT BIOMÉRIEUX

Pioneering Diagnostics

A world leader in the field of *in vitro* diagnostics for over 55 years, bioMérieux is present in 44 countries and serves more than 160 countries with the support of a large network of distributors. In 2019, revenues reached €2.7 billion, with over 90% of sales outside of France.

bioMérieux provides diagnostic solutions (systems, reagents, software and services) which determine the source of disease and contamination to improve patient health and ensure consumer safety. Its products are mainly used for diagnosing infectious diseases. They are also used for detecting microorganisms in agri-food, pharmaceutical and cosmetic products.

bioMérieux is listed on the Euronext Paris stock market.
